DETAILED ACTION

Since the Japanese priority of December 5, 2002 predates the effective US filing date of US Patent no. 7,151,788 under 35 U.S.C. 103 (e) (December 24, 2002), along with a verified translation of the certified priority document, the rejection over Imakado (US 7,151,788) has been withdrawn. Claim 5 is also addressed below.

Allowable Subject Matter

Claims 1-5 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art does not teach or suggest a laser processing apparatus for irradiating a wafer-like object to be processed with laser light while locating a light-converging point within the object so as to form a modified region within the object the apparatus having a beam expander for enlarging a beam size of the laser light emitted from a laser light source, a condenser lens for converging the laser light incident thereon by way of the beam expander into the object and a lens holder holding the condenser lens and including a first light-transmitting hole for making the laser light incident on the condenser lens, where a stop member having a second light-transmitting hole for narrowing and transmitting the laser light is disposed on an optical path of the laser light connecting the beam expander and the first light-transmitting hole to each other and is separated from the lens holder (independent claims 1 and 5).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
